

Minecraft EE Creative Mode Activated

20th July – 14th August 2026.

Below are photos of some of the activities and environment the Minecraft EE sessions are held in Summer 2026 at Bure Valley school. We hope this will help you feel reassured of what fun activities await!

Enter the school hall for the activities.

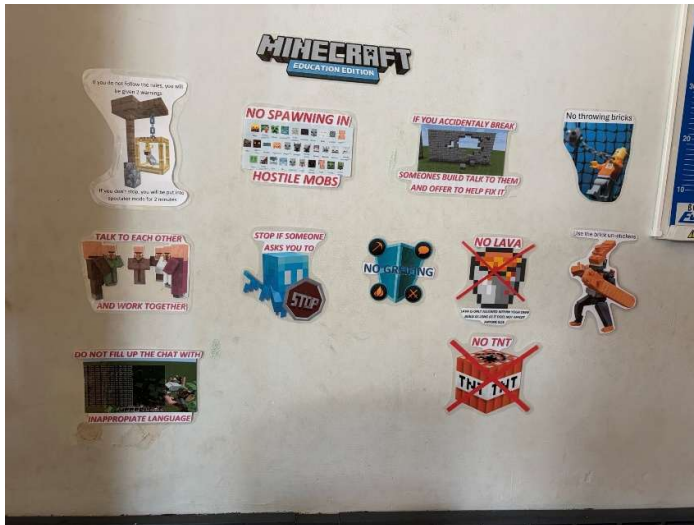

There will be 12 laptops with instructions on how to use the keyboards and mouse to navigate through Minecraft Education Edition. You can play in the same or different realms. These are all private realms so only people at the club can log in.

There are a few rules to ensure everyone is able to play and build safely. For example no flowing lava. Lava can be used only if it is contained. This is because we do not want lava accidentally destroying another player's build.

There are plenty of off screen activities to do. There is multiple Minecraft lego sets to build.

There is minecraft colouring sheets and drawing.

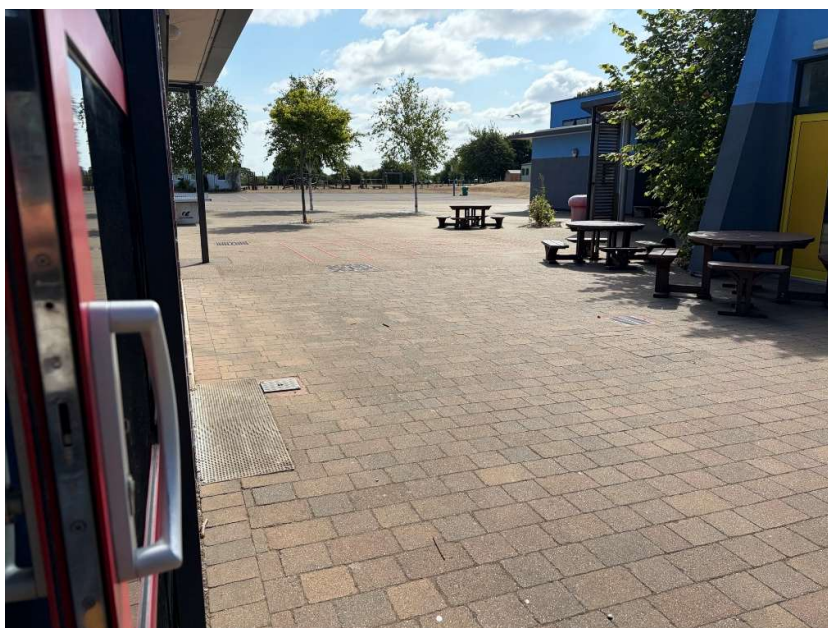

There is also a Minecraft recipe builder activity.

There is plenty of opportunity to go outside and play on the playground or field. There will always be an adult present to ensure safety.

Adults like to play games too! Lunch can be eaten inside or outside.

We hope these photos have been helpful.
